

Coffee

This problem gives you the chance to:

- use a chart to solve simultaneous equations

This chart shows the cost, in cents, of different numbers of small and large cups of coffee.

1. Explain what the number 500 in the chart means.

2. Use the information in the chart to find the cost of a small cup of coffee and the cost of a large cup of coffee. Show how you figured it out.

Small cup of coffee costs _____ cents Large cup of coffee costs _____ cents
